

AB-Sorb[®]

AB-Sorb[®] is a high performance absorber for all kind of liquids (water, oils, spillages). It has been formulated to develop the following properties:

- ✓ High absorption capacity.
- ✓ No dust during handling and application.
- ✓ Bad odour neutralising.
- ✓ Easy-flow, penetrates to inaccessible areas.

Active ingredients in **AB-Sorb[®]** have sponge-like structure and absorb the liquids inside millions of micropores. The product is harmless when inhaled or in contact with skin and is exempt of quartz, which could be cause of breathing problems if inhaled.

AB-Sorb[®] contains essential oils that neutralise actively the bad odours and provides pleasant and permanent perfume.

Examples of application are: **Rubbish containers, animal urine in cat litter or corners, domestic and industrial accidental liquid spillages (water or oils), ashtrays, dangerous liquids containment, etc.**

Other specialties produced by AB INNOTEC:

AB-Sorb[®] plus is an improved version with higher performance. It is indicated when extreme absorption capacity is required, keeping the ability of neutralising bad odours.

AB-Sorb[®] LC is a simplified low cost version exempt of perfume and odour neutraliser. It is suitable to be used to absorb liquid spillages and recover as a solid in a simple and fast process..

AB-Fresh[®] is a liquid odour neutraliser. It can be applied spraying on the source of the odour, eliminating the problem fast and effectively.
